

Users gain an average of 20% efficiencies when they use Raven's Slingshot platform to create a Connected Workflow™

REAL TIME FLEET TRACKING

Slingshot Fleet Tracking allows users to wirelessly track the location and other important information about their trucks, vehicles, trailers, tanks and other moving assets by providing accurate machine running data in real-time. This gives ag retailers and enterprise growers a holistic view of their entire fleet — including work, idle and transit times — to better manage their equipment, assets and operations.

- Real-time view of a single vehicle, entire fleet or predetermined group
- Geofencing of a field, delivery point or general point-of-interest
- Precise location data with status, speed, relative address, weather stamping
- Vehicle performance history
- Maintenance alerts
- Management of unlimited users with access credentials
- View of vehicle location for easy access to send to customers
- Free mobile app which allows you to view your fleet while on-the-go
