

RAVEN AND SYNGENTA FORCE® EVO INJECTION CABINET

“Force Evo is much more equipment-friendly. The machine doesn’t have to work so hard to pump. It flows easier, so it makes it better to mix into the fertilizer.”

- Mike Geurts, Marshall, MN

FORCE® EVO CORN INSECTICIDE

Force® Evo is high performing liquid soil applied insecticide for control of corn rootworm and other soil dwelling insects in corn. Force® Evo is injected into a carrier stream (water or starter fertilizer) at planting (in furrow) which creates a zone of protection around the seed. Force® Evo is packaged in a bag-in-box and is applied through a closed application system by Raven.

FEATURES AND BENEFITS

- Vertical chemical box configuration
- Bag spout points down
- Cabinet door swings horizontally, not downward
- Pump is outside cabinet
- Cabinet size (inches): 31.5 W x 21.75 H x 14 D
- Gravitational flow of product to the spout
- Complete package emptying from vertical configuration
- Simplified and convenient loading and unloading of the Force® Evo boxes
- Easy closed connection with push button coupler
- Significantly improved user experience during application

RAVEN APPLICATION SYSTEM

Raven’s Syngenta Force® Evo Injection Cabinet is a convenient, closed system enabling a vertical orientation of the Force Evo product inside the cabinet for improved handling and application.
